

SEARCHABLE RESULTS TIPS

If your event will be using AllSportCentral's Time Tracker, Finisher Certificates, or Events Photos you will need to use the "Timer Software Interface" results type on the Online Services page for your event setup. When doing so you are also eligible to have the live results and hosting fee waived. We have updated your results type to try to make it easier for you and have included basic instructions below:

SEARCHABLE/SORTABLE RESULTS UPLOAD:

- (1) Login with coordinator account
- (2) Select "View My Events"
- (3) Select green icon with stopwatch inside to the right of the race for which you want to enter results
- (4) Select the necessary results fields from the left column and move them to the right column in the order they appear in your file
- (5) Be sure to remove any extra commas from your upload data (e.g. Thomas, Jr.) commas should only be used to separate fields (e.g. FNAME, LNAME, BIB, etc).
- (6) Be sure that ALL fields are set to field type "Text" especially splits, pace, and finish time (HH:MM:SS)
- (7) Upload results file
- (8) Go online to verify proper format by selecting the green results icon next to the event name

If you are unable to select field names during the results upload process then you need to change the results type on the Online Services page to "Timer Software Interface". You can also visit the Coordinator Help area and download and watch the Results Overview video for additional pointers.
